

3ality Digital and ARRI Media join forces

3ality Digital, world leader in advanced technologies to empower creative digital stereoscopic 3D (S3D) acquisition, has inked a deal with leading UK rental house ARRI Media as its rental and service partner in the UK market.

The deal will allow ARRI Media to supply 3ality Digital active S3D shooting systems to TV, commercial and feature film customers. The new partnership will expand equipment availability, as 3ality Digital's systems will be on hand to rent direct from ARRI Media's London and Manchester bases.

Rycote poles go graphite...

Rycote®, the UK manufacturer of advanced microphone windshields and shockmounts, has added three telescopic carbon-fibre boom poles to its range of accessories for broadcast and location sound recordists: the 1.63-metre-long G3, with three sections, and the 2.49-metre-long G5, with five sections. The G5 is itself available in two versions, a standard version and one with an internal coiled cable and built-in Neutrik XLR connector in the hilt.

For several years, following their takeover of US boom pole manufacturer Lightwave Audio, Rycote has been selling telescopic boom poles under the Lightwave name. However, with the launch of the Rycote-branded G-series carbon-fibre poles, the entire range, including the A3 and A5 aluminium poles, will now be rebranded as Rycote products.
